

Educators National School Safety Association™

The Educators National School Safety Association (ENSSA™) was created as a central repository and communication portal to educate schools and learning centers in “Best Practice” security protocols and solutions. This robust site provides educators, faculty, staff (and their school safety partners) with quality information, resources, consultation, and training. ENSSA also connects schools and learning centers to share effective ideas and strategies which are paramount in the prevention of school crime and violence. ENSSA works with the United States Departments of Education, Justice, and Homeland Security to identify and promote strategies that ensure safe learning environments for students and educators. By providing information and establishing open lines of communication between educators and safety advisors, we can all work to keep “Safe Schools in America”.

PLEASE JOIN ENSSA TODAY. Through your membership and private donations, ENSSA Promotes School Safety by providing current “Best Practice” tools and techniques to schools and learning centers throughout America. ENSSA validates all training programs and product offerings developed by companies that specialize in school safety and security prior to hosting these solutions on ENSSA. Our team of ENSSA school security experts ensure only the best information, training material and security products are provided to teachers, administrators, & support teams.

ENSSA has established an Advisory Board consisting of school leaders, civic and community leaders, law enforcement, and others who share in the common goal of keeping our schools safe. The mission of the Advisory Board is to provide guidance as to the future of school safety. This eclectic group represents those who “touch” education and has been assembled to ensure shared lines of communication are established as new protocols and techniques are validated. School Safety updates are immediately provided through the ENSSA website, public events, and National Conferences. The timely sharing of information is essential in working to keep our Schools Safe.

Tactical

“SHELTR”

TrainingSM Program

Unfortunately schools and other public venues around the world are becoming a target to foreign and domestic terrorism. There are not enough law enforcement officers available to secure every location where a terrorist or terrorist organization may attack. The ‘SHELTR’ Training courses and Tactical Protective Gear gives the school, university, or workplace a chance to defend from an Active Threat. Safety Hazard-Emergency-Lethal Threat ResponseSM (SHELTR) Training provides Teachers, employees, maintenance staff and grounds keepers with training tools and techniques in which to keep their school safe. These tools and techniques teach how to “LOOK” for things that are out of the norm, “REPORT” incidents in a timely and accurate manner, and “RESPOND” if your campus or workplace becomes engaged by a threat or crisis situation.

‘SHELTR VISION’TM Mobile Application

Developed for iPhone and Android operating systems, the SHELTR VISIONTM mobile application allows direct communication with authorities while in a crisis situation. Utilizing video, sound, GPS, and an emergency location beacon, authorities monitor

PAK-JacketTM System (www.pakjacket.com)

The ‘Protect a Kid’TM Jacket (PAK-Jacket) System is designed for individual mobile protection. Manufactured to NIJ-IIIA ballistic standards, the PAK-Jacket System will provide protection from .22, .38, .44, and 9mm rounds. In addition, the jackets are fire retardant, cut resistant, razor/slash resistant, and stab proof. Each jacket includes Kevlar gloves, high heat intensity goggles, vacuum sealed first aid kits, and a high decibel whistle. The PAK-Jacket System is a versatile option for safety and

Blast Boards (www.blastboards.com)

The Blast Board is a ballistic white board that provides NIJ IIA Ballistic Protection. The boards can be fastened in place of an existing whiteboard/chalkboard or be purchased as a stand alone product. “Wall Mounted” Blast Boards are mounted with a single point quick release system that lowers the board to the ground in less than 3 seconds. The back of each board is equipped with multiple non-slip handles to provide users with protection while moving to a safe location. The blast board also provides superior protection when used as a shield in the classroom safe area.
